

STAR FIT

Since 2005 Starfit has evolved into a sustainable supplier and distributor of OEM cast / forged products, finding a perfect balance between quality and price. Manufacture processes include precision machining, CNC milling, CNC Lathe, investment casting, sand casting, forging and die-casting for prototype and volume production. Starfit has a wide product portfolio, offering products in various different materials including, stainless steel, alloy steel and carbon steel.

Starfit's core advantages are fast deliveries, superior quality and competitive pricing.

CNC machine

Shell making

Auto-drying system for casting

Hammer forging

Furance

Sand blasting

Quality control with advanced test equipment.

Metallurgical microscope

Coordinate measuring

Roughness

Universal mechanical tester

Impact tester

Spectrometer

Starfit perceives the quality of products as the major component in guaranteeing sustainable B2B operations. Therefore Starfit offers products with major quality certifications such as the International Organization for Standardization (ISO). Furthermore, Starfit has an entire department with engineers responsible for accurate first hand testing of products from raw material to the final product, in order to fulfill customer's expectations.

Materials

- Ferrous alloys, stainless steel
- Cast iron, ductile iron
- Aluminium & copper alloy
- Nickel base super-alloys

Capability

- Casting size: 10g to 40kg
- Forging size: 200g to 1500kg
- Quantity:
1000 to 1000k pcs/lot

Our products are applied in a wide range of industries.

Automobile Parts

Hardware Accessory

Meters and Pump Accessory

Forging samples
